PREVENTING MEDICATION MISTAKES

I understand mistakes in taking medications properly often is the reason that patients return to the hospital soon after the discharge. I will carefully read all instructions (dose, time and possible side effects) about the medicine. I will talk to the doctor and the pharmacist about questions or concerns that I may have. I will create a routine to make sure the medications are taken as prescribed by the doctor.

| Medication | Dose | Time | Reason | New | Allergies/ Side effects |
|------------|------|------|--------|-----|-------------------------|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

TO BETTER MANAGE MY LOVED ONE'S MEDICATIONS, I WILL:

- Take these notes and reminders with me to ALL doctors visits and hospitalizations.
- Call the doctor if i have questions about these medications or if i want to change the dosage or form of the medications.
- Tell the doctor about all the medications the patient is taking including "over the counter" medications, drugs, vitamins, minerals, and herbal supplements.
- Know the reason for each medication.
- Know how much, when and for how long each medication is to be taken.
- Know possible medication side effects to watch out for.
- Know what to do about each side effect.
- Update medication list.
